BOTANICAL GARDEN Esteemed Sir!.

You are receiving herewith the promised extract from the duplicates of the Royal Herbarium, naturally with the consent of the curator. In the selection of this I took into consideration as much as possible your wishes in regard to the flora of Labrador, Japan, Greece, and Brazil and hope that the largest part will be new for you. Sometimes the specimens turned out rather meagre but for the moment nothing else could be done; later on it will probably go better. 'At the beginning of my occupation at the Royal Herbarium I found no orderly duplicate reserve at all in the true sense of the word, which also could not at all be in the private interest of those employed in this.

In exchange you have promised plants from Texas of which, with the exception of individual ones from Drummond, only a few are at hand at the Royal Herbarium.

Besides, plants which have become known through you, are naturally most welcome at the Herbarium. Moreover, the North-American flora is pretty well represented in the Herbarium of Zuccarini through Mr. Gray, Torrey and Tuckermann, namely by individual families, as e.g. the Cyperaceae, Smilaceae. Unfortunately there is no special catalogue about these families in the herbarium, so that what is missing could more easily be completed.

In the event that from the German or Munich Flora you wish to have one or the other, then please send us a desiderata list.

If I do not have occasion to write to you again before your return trip, then in addition to wishing you a Happy New Year, I also wish you a pleasant journey, and remain,

Sincerely,

Dr. T. H. Schultes

Prof. Sendtner sends his greetings.
